People have come to me for Beyond Reiki Treatments, with an extra ordinarily long list of problems they wish to resolve. My approach is to take a detailed case history that tracks back to examine the root of a condition. As a matter of course, few people can accurately target how come their lives are out of kilter and fewer still know what to do about it. We each constantly compromise, with what we believe to be right for us, against what others expect of us. These internal compromises lead directly to dis-ease. Extended states of dis-ease can lead to illnesses that manifest at every level of our being.

Bacteria, Fungus, Virus all occupy our biosphere with us, when they get out of balance then toxicity and damage arises. Nature abhors a vacuum, so germs proliferate where there is opportunity. This means the most crucial consideration to a case, is found in examination of when problems arise and how did they all start. Rarely this will take the case to a past life condition, that must then be safely examined. More often inherited hidden behaviour patterns, have caused individuals to fail to properly prioritise their own wellness.

A consultation involves a fact find (length dependant on the form of therapy, or treatment), followed by a hands-on treatment on the couch. In some special cases, it is necessary to have a number of consultations, before direct contact can be made. If there is an issue and a couple wish help with fertility, then I will need to see both partners separately (even if there is an established biological cause).

I am happy to work alongside conventional medical treatments, simply because I respect the choices that clients make. Reiki is famous for helping people deal with toxicity and side effects in their medication. Beyond Reiki has an excellent record supporting people when they need help reducing, or coming off, chronic medications, on the advice of their Medical Practitioner.

Some clients decide to attend courses, in order to accelerate their own healing process. For some people complex undercurrents are only resolved when attending group training. This is because the teaching space is designed to elicit healing encounters, supported by people other than the Beyond Reiki Practitioner.

Healing often requires self development, because otherwise the Body Mind and Spirit conflict, at the core of most people's problems, simply reverts once the outside attention has ceased. All healing is ultimately self-healing and we are simply calling on others to facilitate or intervene, when we are at a loss as to how to proceed. Our bodies have a vast healing potential, that we each need to be shown how to reach.

### Come for Attunements

2008

Attunement simply means getting you back in tune, with your true self. Few are in direct dialogue with their higher functions and so my task is to mediate. More spiritually Attunement can be expressed as atonement, or at-one-ment (to be at one, is to be hale hearty and well). The individual is then responsible for making the changes, in their life that will lead them to a more harmonious pattern of living. Attunement is a special form of Beyond Reiki Treatment delivered by your attending Master Practitioner.

Our immune systems need to see the foreign agent, so that we can overcome its influence. At a deeper level, we also need to see the problem in true perspective. Beyond Reiki helps us face our situation, with fortitude and enables us to brave images, or memories of trauma, that we have deliberately chosen to forget, or have simple been unable to perceive.

When you come for treatment you can be sure of a warm welcome. My task is to show your body how to access clean fresh energy. This can help with the complete recovery from accident, illness or injury. Startling rejuvenation is possible, as the body cells flush out toxicity and replace disease with a sense of wellness. Sometimes this may involve confronting uncomfortable processes.
